1 About this Operating manual

This operating manual should be read before installating the LifeField Polarizer for the first time, or when servicing it as an authorized technician. Please contact Meditech Europe if you have any questions.

Please pay particular attention to chapter 2, "General Safety Instructions".

1.1 General

The instructions in this manual are intended to familiarize you with the LifeField Polarizer and ensure that you can make the most of this product's function.

The Operating manual contains important notes for safe and proper installation of the LifeField Polarizer. This will contribute to:

- Avoiding hazards
- Avoiding repair costs and product failure
- Extending the reliability and lifespan of the product

These instructions should be read and applied by any person authorized to work on the LifeField Polarizer and over 18 years of age.

In addition to this Operating manual, the regulations on accident prevention and environmental protection as applicable in the respective country of use and location of application must be observed.

1.2 Warning signs

Non-ionizing radiation
This means the product emits low-energy radiation from radio waves and radio frequencies.

2 General safety instructions

2.1 Principles

When in doubt, please always contact Meditech Europe.

Do not open the LifeField Polarizer. Only a specialized Meditech Europe employee is allowed to open the device. The warranty is void if the product has been opened by anyone other than Meditech Europe specialists.

Never place the LifeField Polarizer in damp areas such as the bathroom.

The Life Field Polariser is an experimental product that acts on forms of frequencies. It is not a medical device. No rights can be derived from the use of the LifeField Polarizer, nor can any claims be made as a result of its use. Use of the LifeField Polarizer is at the sole risk and expense of the user.

Cleaning the Life Field Polarizer: unplug the device (if applicable). Use a dry cloth. For stubborn stains, a damp cloth can be used. Make sure the plug (if applicable) does not get wet. Before plugging the product back in (if possible), the plug must be dry.

If in doubt about the use of the LifeField Polarizer, please always contact Meditech Europe by phone: 0031 (0)527 292331 or email: info@meditecheurope.nl.

Meditech Europe is not liable for misuse, improper use or any damage caused by any use other than described in this manual. In case of disputes, Dutch law applies.

2.2 Intended use

The Life Field Polariser is an experimental product that acts on forms of frequencies.

2.3 Staff selection and qualification

The LifeField Polarizer is manufactured by Meditech Europe in Emmeloord (NL). Meditech Europe employs only well-trained employees.

2.4 Safety instructions

Always install the LifeField Polarizer in a dry space. Place the LifeField Polarizer such that other materials cannot come into contact with the product.

Ensure that the LifeField Polarizer does not come into contact with heat sources such as fireplaces, gas stoves, open flames, etc.

If the product is damaged, it should be repaired by Meditech Europe.

2.5 Emergency measures

When a fire breaks out, use a fire extinguisher suitable for electronic equipment.

3 Scope of delivery

1x LifeField Polarizer

Available in various types. Images of the various types are listed on Meditech Europe's website.

4 Technical description

4.1 Overview

The LifeField Polarizer creates low-frequency resonances. The product is connected to 220 V (model with plug), however, it does not consume power because no closed circuit is made within the LifeField Polarizer.

4.2 Model plate

Fig. 4.2 Model Plate Powerful

Supplier	: Meditech Europe B.V.
Details	: Type and capacity
Batch ID	: Unique per batch

5 Transport

The LifeField Polarizer should be handled with care.

5.1 Prior to transportation

Meditech Europe carefully packages the LifeField Polarizer once scheduled for transport or pick-up.

5.2 Transporting the product

The product should be transported inside its protective packaging.

5.3 Unpacking the product

The LifeField Polarizer should be unpacked carefully, without using any sharp tools. Do no drop the product, it is vulnerable.

6 Operating the product

6.1 Activating the product

The energy field around the LifeField Polarizer is always there (both with and without a plug) due to the resonance of the Lakhovsky copper rings incorporated into the device. In the socket, the energy field is amplified by the copper from the power grid.

Plug the LifeField Polarizer into a power socket if you have the model with the plug.

6.2 Operating the product

No additional operation is required/possible.

The product does not come with any accessories.

6.3 Disabling the product

Unplug the LifeField Polarizer if you have the model with the plug.

7 Assistance with malfunctions

If the product is broken or rattles, it should be repaired by Meditech Europe.

8 Decommissioning

8.1 Disposal and recycling

Contact Meditech Europe for disposal and recycling of the LifeField Polarizer. Meditech Europe is happy to accept all products for disposal and recycling in accordance with environmental regulations.

Contact the local authorities if you, the user, wish to dispose of the product yourself.

9 Warranty

Meditech Europe provides a 2-year warranty on the LifeField Polarizer.

The warranty is void if the product has been opened by anyone other than Meditech Europe specialists. Or if the product has been dropped.

Meditech Europe is not liable for misuse, improper use or any damage caused by any use other than described in this manual.

10 EC Declaration of Conformity

Meditech Europe

EC DECLARATION OF CONFORMITY

This declaration has been issued under the sole responsibility of the manufacturer

Manufactorer

Company name:	Meditech Europe B.V.
Full address:	Daalder 14
Postal code:	8305 BE
City:	Emmeloord
Country: Netherlands	
Person authorised to the technical fil compile:	Ms J. Kraaij / Operational Director

DESCRIPTION AND IDENTIFICATION OF THE MACHINE

Generic name:	Life Field Polarizer
Function:	The Lifefied Polarizer is an experimental product that acts on forms of frequencies
Commercial name:	Life Field Polarizer

CONFORMITY

The manufacturer declares that the above products comply with all applicable provisions of

RoHS Directive 2011/65/EU & Delegated Directive (EU) 2015/863
Low Voltage Directive 2014/35/EU

Whereby the following harmonised standards and, where applicable technical standards and specifications have been applied
